AIRLINE PASSENGER DASHBOARD

Power BI visualizations & insights

A simple explanation of the KPIs, charts, filters, and what each visual helps us understand. Based on 129,880 passengers.

- Power BI Dashboard | 129.88K passengers analyzed
- KPIs: Avg Age 39.43 | Avg Distance 1.19K km | Avg Delay 15.09 min
- Satisfaction: 73.45K (56.55%) vs 56.43K (43.45%) - NPS 13.1
- Total Revenue Opportunity: $12.75M if fixed

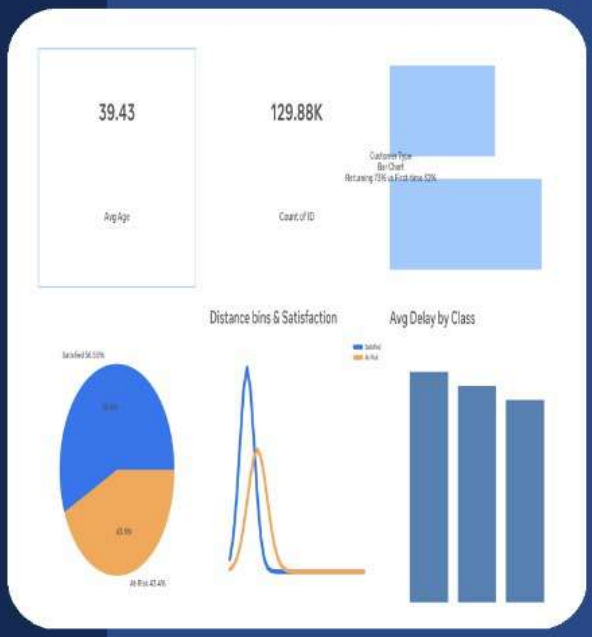

1. Dashboard at a glance

Purpose, Main question, How to read

Purpose:
- Quickly summarize passenger experience and flight patterns

Main question:
- Which groups and flight conditions relate to satisfaction?
- How much revenue at risk due to dissatisfaction?

How to read:
- Start with KPIs (39.43, 129.88K, 1.19K, 15.09), compare groups
- Then use filters (Gender, Customer Type) to narrow view
- Revenue lens: 56,430 at-risk ≈ $12.75M opportunity

2. KPI cards: the headline numbers

39.43 | 15.09 | 1.19K | 129.88K

Average Age — 39.43

- Middle-aged core traveler - Business vs Leisure mix

Average Arrival Delay — 15.09 min

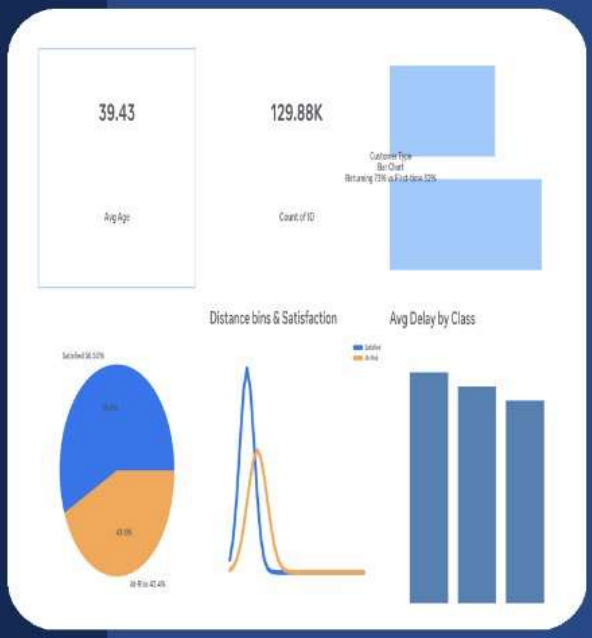

- Mean delay about 15.09 min, above 15-min threshold
- Above 15 min dissatisfaction +20-25% - tipping point

Average Flight Distance — 1.19K km

- 1,190 km average - mix short domestic + long international

Count of ID — 129.88K = 129,880 records

- Large reliable sample, each ID = one journey
- Satisfaction: 73.45K (56.55%) Satisfied vs 56.43K (43.45%) At-Risk

3. Donut chart: passenger satisfaction

Overall health check - 56.55% vs 43.45%

What it shows:

- Share of satisfied vs neutral/dissatisfied - 73.45K vs 56.43K

How to explain:

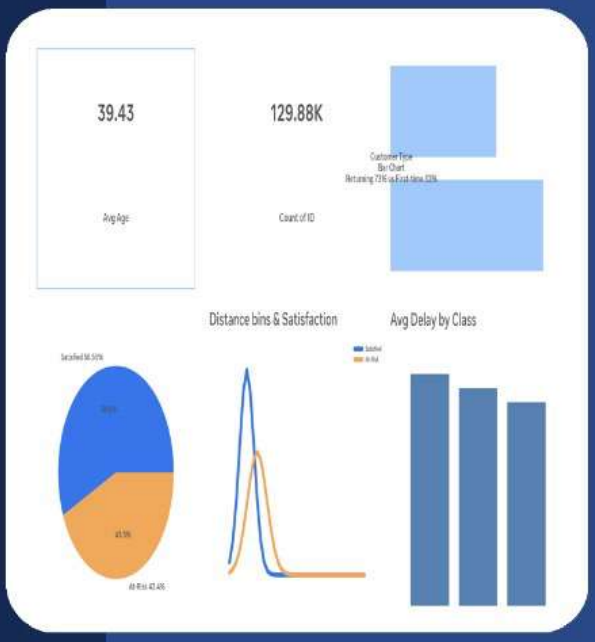

- Neutral/Dissatisfied 43.45% = 56,430 passengers at-risk
- Satisfied 56.55% moderate not world-class, NPS 13.1 vs 30-35

Why it matters:

- Quick overall view and baseline for improvement

Conversion Strategy:

- Split: Neutral 18% (19-22K) Easy + Dissatisfied 25% (34-37K) Hard
- Play 1 Neutral->Satisfied Easy <$10K: Cleanliness, Crew - 10K impact
- Play 2 Dissatisfied->Neutral Hard: Delays, Baggage - 7-11K impact
- Combined 56.55% -> 70-73% world-class = $7.5M retained

4. Compare satisfaction by customer type and class

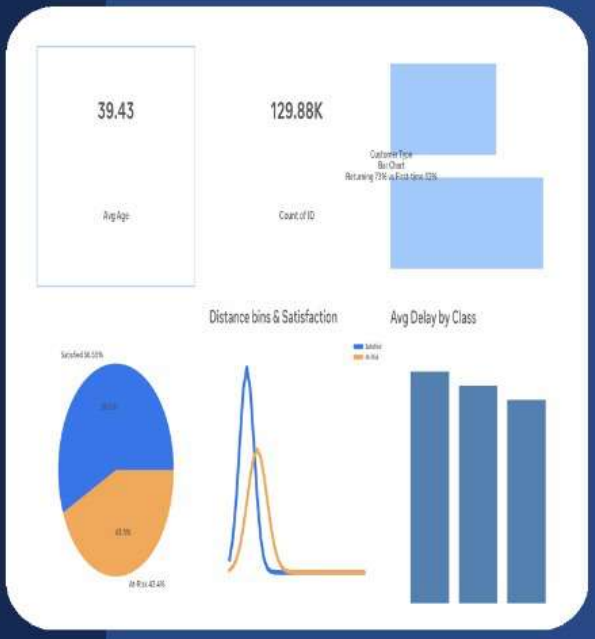

Returning vs First-time | Delay by Class

Customer Type chart - BIGGEST LEAK $5.25M:

- Returning: 75K total, 55K satisfied = 73% LOYAL BASE
- First-time: 52K total, 17K satisfied = 32% - 68% LEAKING
- Gap: 2.3x higher dissatisfaction, first impression failing
- Revenue: 10.5K lost x $250 x 2 = $5.25M Annual Lost
- Why? Returning know process + loyalty, First-time anxious
- Action: Welcome Program - 500 bonus miles for 2nd flight in 60 days

Class & Delay chart - $7.5M Opportunity:

- Economy Plus 16.5 min HIGHEST paradox vs Business 14.5 min LOWEST
- Reduce to <10 min = 15K converted = $7.5M retained + $2.25M referral

5. Flight distance distribution

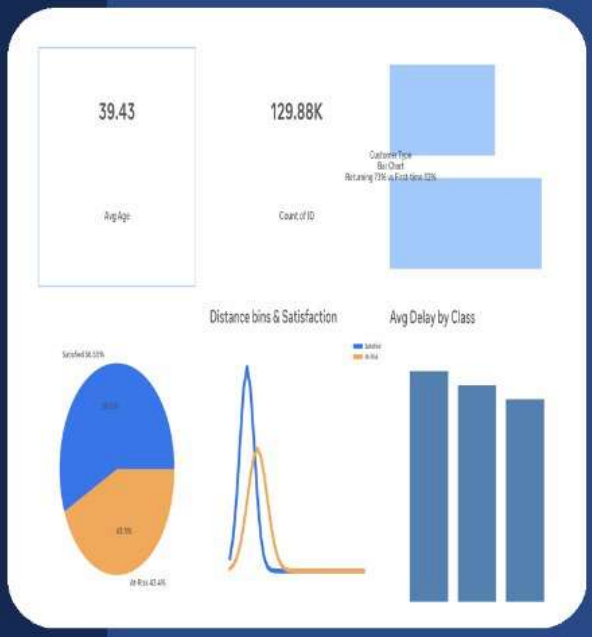

Middle Distance Misery 500-1500km

Count by Flight Distance and Satisfaction:

- Shows counts across distance split by satisfaction
- 0-500 km: High volume mixed OK - short hop low expectation
- 500-1500 km: PEAK DISSATISFACTION light blue 4-5K vs dark blue 3K
- PROBLEM ZONE - Domestic trunk routes Delhi-Mumbai high frequency
- 3000+ km: ~90% Satisfied - Long-haul full meal entertainment more crew

Flight Distance (bins):

- Bins group distance into ranges, easier to read
- Why Middle Misery? 2-3 hour flight but short haul service no meal/WIFI
- Action: Free 30-min WIFI + premium snack + app entertainment
- Pilot 3 routes vs control Expected +8-10% satisfaction

6. Interactive filters (slicers)

Gender + Customer Type - Segmentation

Type of Travel & Gender:

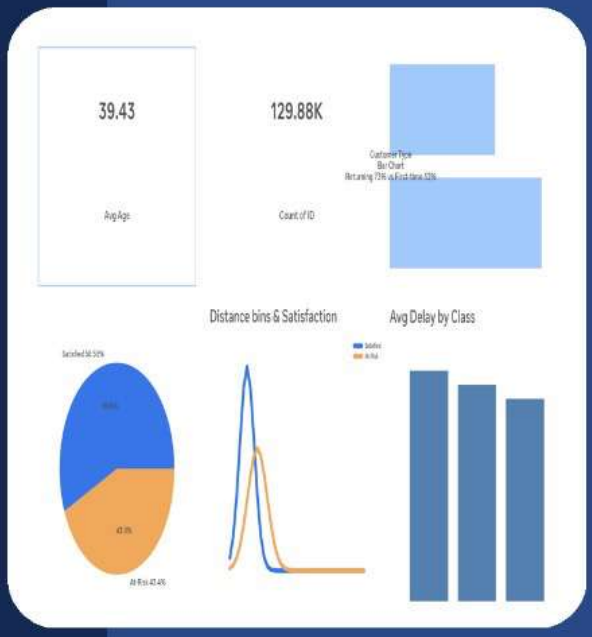

- Slicers let viewer focus on particular segment
- Gender: Female / Male - Compare satisfaction by gender
- Gap: Has Gender slicer but no Gender vs Satisfaction visual
- Opportunity: Add Gender analysis - different drivers

Customer Type:

- First-time vs Returning - 32% vs 73% = $5.25M leak
- Use filter to show 68% dissatisfaction in presentation

How to use:

- Click slicer option, cards and charts update together
- Tip: Ctrl + click if multi-select enabled
- Use Customer Type = First-time to highlight issue

7. Key takeaways & conclusion + Roadmap

Revenue $12.75M + Action Plan

1. Satisfaction is split:

- Donut 56.55% vs 43.45% = 56,430 passengers NPS 13.1 vs 30 benchmark

2. Passenger segments differ:

- Returning 73% vs First-time 32% = 2.3x gap = $5.25M leak
- Economy Plus 16.5m delay highest paradox = $7.5M opportunity

3. Distance is uneven:

- 500-1500 km PEAK dissatisfaction = Middle Misery - Free WiFi + snack
- 3000+ km 90% satisfied = long-haul full service

Roadmap:

- Immediate 0-30d Low Cost: Fix labels, survey 1000 pax, daily delay report
- Short 1-3M +10% to 66-68%: Loyalty, route reallocation, WIFI, comp 250 miles
- Long 3-12M 70-75%: AI prediction + SMS, personalization, live NPS
- Conclusion: Summarizes demographics, delays, distance, satisfaction. $12.75M opportunity if fixed.
